1 Q 1 1 1 1 Fall.

Astronomy, and Astrology, in all its parts, with several Varieties not known to every Professor, is practised and taught by the Author at his house, at the *Blue-Ball and Star* in *Salisbury-court, London*. Where you may be furnished with *Blank Schemes and Speculums* for Nativities.

ADVERTISEMENTS.

HAVING formerly propos'd the Calculation of an *Ephemeris* for Years to come; but being hindred of late by my daily Avocations; These are therefore to inform all Lovers of *Astronomical Learning*, that I am not unmindful of my Proposition; but that it shall go on with all convenient speed: Wherein the Planets *Diurnal Motions* shall be carefully exhibited, to regain the Honour of the English Nation, which our present *Ephemerist* hath enormously stained.

The same Author hath published already 2 Volumes of *Ephemerides*, and neither of them a Calculation, *beware the Third*. If he thinks, or would make the World believe that I do him wrong; I am ready at any time to give him the meeting with this in one hand and his two Volumes in the other, to make good my assertion, and prove what I allege to be true.

And whereas in this present year's *Diary*, he does insinuate, by specious pretences, how glad he would be to see such a work performed by another hand: yet by innuendo would query or suggest, whether it may be carefully performed. In answer to which, this is the sixth of my *Annual Ephemerides*, the foregoing having been accepted of with a general Esteem by all knowing persons, and thereby given proof of my abilities in performing the same. Therefore hope there may be no cause to suspect my future Labours to be performed with less diligence. Let this Degraded therefore first find me a Defaulter before he publishes me one; when he hath done so it will be time enough to make Proclamation, till then it will be good manners in him to be silent.

Philadelphia, or Brotherly Love to the Studios in *Hermetic Art*. Wherein are discovered the Principles of *Hermetic Philosophy*, with much candor and plainness By *B. Pbi.*

Three Tracts of the great Medicine of Philosophers. I. *Extimul Ars Metallorum Metamorphosis*. II. *Brevis Manuductio ad Rubinum Calystem*. III, *Fons Chymica Philosophiae*: all written in Latin, now translated into English, and both sold by *T. Sorel* in *White-hart court* in *Gracechurch-street*, London.

A D V E R T I S E M E N T S.

T H E R E is published an ingenious Treatise, entitled *Averroea*, being a Transcript of several Letters from *Averroes* an *Arabian* Philosopher, at *Corduba* in *Spain*, to *Metrodorus* a young *Grecian* Nobleman, Student at *Athens*, in the years 1149 and 1150. Also several Letters from *Pythagoras* to the King of *India*, with his reception at the *Indian* Court; and an account of his discourse with that King and his *Gymnosophists*, and his Rules and Precepts: his account of the power and efficacy of Numbers, and the Magical uses thereof. The whole containing Matters highly Philosophical, Physiological, Pythagorical and Medicinal. This work having been long concealed, is now put into English for the benefit of Mankind, and the rectification of learned Mistakes, and Sold by *T. Sowle*, in *Whitehart-court* in *Grace church-street*, *London*. Price 2s 6d.

J O R D A N's *Copy-Book*, with brief and easie Directions, whereby one of an ordinary Capacity may attain to write without a Teacher. Sold by *W. Boddington*, at the *Golden-ball* in *Duck-lane*.

True Spectacles.

T H E extraordinary Method of making Spectacles on Brass Tools, now used by *John Yarwell*, viewed by the Members of the *Royal Society*, approved of by the Company of *Spectacle Makers*, acknowledg'd by the best skill'd in Opticks be ground to the greatest Perfection that can be performed by Art; with *Telescopes* of all lengths fitted for Day and Night; *Perspectives* great and small, with *Eye-Glasses* for any kind of Weather; *Microscopes* single and double, after the newest and most convenient way for the Pocket; *Magnifying*, *Multipling*, and *weather-Glasses*; *Triangular Prisms*, *Concave Metals* and *Concave Looking-Glasses* of all Diameters; *Speaking-Trumpets* and *Reading-Glasses* of all sizes; with all other sorts of Glasses both *Concave* and *Convex*, after the latest and most useful Invention. All the above-named Instruments are made and sold at the *Archimedes* and *Three Golden Prospects* in *S. Paul's Church-yard*, *London*, By *John Parwell*.
